

Boat Pre-Transport Checklist

Our drivers are experienced, dependable boat transporters who will take the utmost care to deliver your boat in the best condition. However, we cannot be held responsible for pre-existing structural flaws so please be sure that your boat is sufficiently sound for road transport.

Remember, we TRANSPORT boats. There will be an additional fee if we need to prepare your boat for transport. To avoid extra charges, please ensure that all checklist items are completed before pick-up time. Your quoted price covers a 45 minute load and 45 minutes to unload. In most cases this is more than double the time required.

If a third party is responsible for the preparation of your boat for transport (dealer, marina, etc.) please ensure that they are aware of the items outlined here.

The checklist is below.

Thank you!

- Red Foot Haulers

Boat Pre-Transport Checklist

- Secure all hatches/lids
- Secure doors
- Remove all ropes and fenders
- Remove life ring
- Remove barbecues, coolers, etc.
- Secure all items in the cockpit (carpets, electronic covers, etc.)
- Secure/remove sun pads
- Secure antennas down
- Box up all loose items on board
- Secure all interior cabinet doors
- Secure all salon doors
- Remove all canvas and put inside
- If the boat is to be shipped with a tunnel cover on, please be sure that the fastenings are adequate to withstand highway speeds

Boat Pre-Transport Checklist

- Remove ALL tarps from boat (tarps will not withstand highway speeds)
- Remove shrink wrap (shrink wrap is designed for storage only and may damage boat during transport)
- Remove all items extending past the stated length and width of your boat
- Secure anchor with an extra safety strap
- In most cases boats 32' and up require the radar to be removed (or hung underneath of the arch)
- If the boat has outdrives, stow up at a minimum of 50%
- If the boat is 32' or bigger and has a fly bridge, in some cases the fly bridge may need to be removed
- Batteries must be disconnected or have switches in off position
- Boats are designed to withstand wet environments. However, in the event of rain, if there is anything on you would like to keep dry please stow accordingly.
